HYGYEN® HEALTHCARE

Tritex

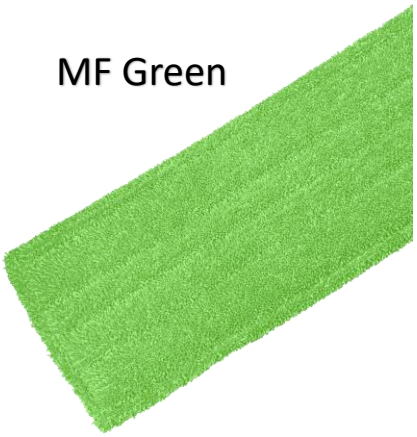

HYGYEN healthcare mops are designed for projects where hygiene and reliable cleaning are crucial. Ideal for your customers in the healthcare, hospitality, food, wellness, and sports industries.

They are resistant to the disinfectants commonly used in cleaning and remain effective even after 500 cycles of washing and drying at very high temperatures. To guarantee these properties, Exive, together with the manufacturer, issues a quality statement for:

1. Effective absorption of dust, dirt, and bacteria.
2. Retains full functionality when dried at temperatures up to 120 °C.
3. Washable at temperatures up to 95 °C.
4. Resistance to all disinfectants commonly used in cleaning.
5. Suitable for use in sensitive environments to prevent cross-contamination with HACCP color coding.
6. A technical lifespan of up to 500 washes with normal use and maintenance.

The HYGYEN Healthcare mops come with a quality certificate from the manufacturer that guarantees these properties..

MF Green

SAFE TO WASH AT 95°C AND DRY UP TO 120°C

<u>Hygiene & Infection Prevention</u>

- One mop per room or space, no reuse before the mop has been washed.
- Use pre-moistened mops to prevent contamination from buckets of water.

<u>Ensure safety and ergonomics</u>

- Use with a lightweight mop frame.
- Moisten for the desired sliding resistance (not too resistant, not too slippery).
- Use with a pole of sufficient length to prevent strain.

MF Zebra

<u>Use color coding to prevent cross-contamination, for example:</u>

Red = toilet facilities
Geel = lavatory facilities
Blauw = general low risk areas
Groen = patient related zones / food

HYGYEN®
HEALTHCARE

Replacing mops is like replacing ink cartridges on a brand-name printer. That is why HYGYEN manufactures high-quality replacement mops for all types of mop frames. By using first-class microfiber, cotton, acrylic, polyester, nylon, and polypropylene fabrics, we give our mops the right properties for every specific cleaning task performed by demanding professionals.

HYGYEN healthcare Tritex

Mop primarily for wet use in the healthcare sector. The combination of three types of fabric makes this mop versatile, user-friendly, and effective:

- Excellent long-fiber cotton retains a lot of moisture to better loosen dirt.
- The long loops of 100% microfiber clean deep into the micro-pores of the floor and retain a lot of dirt.
- The smooth polyester fibers loosen greasy deposits and allow the mop to glide easily over the floor.

The HYGYEN TriTex stands out thanks to its longer, loosely twisted loops, which means that more of each type of textile is present and even coarser dirt can be picked up without prior sweeping.

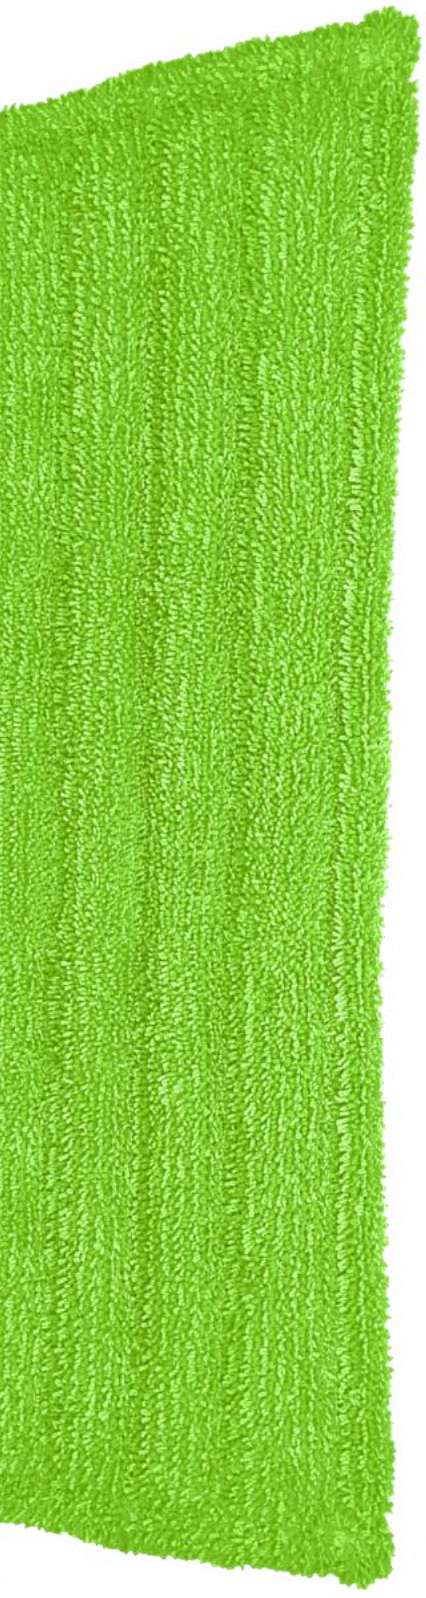

This ensures an efficient and comfortable experience. Professionals appreciate the effectiveness and ergonomics of the mop in various project environments.

With a quality statement guaranteeing these properties:
- Textile stability when washed at up to 95^0C.
- Retention of full functionality when dried at up to 120^0C.
- Lifespan of up to 500 washes.
- Resistant to most disinfectants

Available versions:
129H.4016.12 - HYGYEN TriTex healthcare mop velcro 41cm
129H.5516.12 - HYGYEN TriTex healthcare mop velcro 55cm

HYGYEN healthcare MF Green

Microfiber mop for damp use. Cleans excellently with water or cleaning fluid. It is light to use, while the terry-knitted microfiber, with slightly longer twisted pile, absorbs moisture and dirt excellently. The foam lining also helps to clean minor surface uneven areas.

- can be used with water or detergent
- cleans quickly and effectively with 400g/m^2 microfiber
- Available for every mop system - for use with a mop trolley or pre-moistened

For professionals, this is an efficient, easy-to-use mop that can be pre-soaked and carried in a mop box.

With a quality statement guaranteeing these properties:
- Textile stability when washed at up to 95^{0}C.
- Retention of full functionality when dried at up to 120^{0}C.
- Lifespan of up to 500 washes.
- Resistant to the disinfectants most commonly used in healthcare.
